1. Percentage changes between period averages. 2. Based on the official effective exchange rate basket (trade-weighted). A positive sign indicates appreciation of the Icelandic króna. 3. From June 2007, the presentation of the policy rate has been changed. It is now presented as a nominal rate instead of a yield. 4. Average yield on the interbank market in Icelandic krónur. 5. For Treasury bonds and HFF bonds, the quoted yield is in excess of changes in the CPI. Trading with HFF bonds began in July 2004; prior figures are for housing bonds. 6. Annual figures are changes over one year. Domestic borrowers only as of January 2002. Latest figures are preliminary. 7. DMBs = deposit money banks = commercial and savings banks and other institutions permitted to accept deposits from the public. Since July 2007, derivatives have been counted as foreign liabilities and the presentation of Central Banks' short-term position has been changed.

8. Gross foreign exchange reserves at end of period as a ratio of the average monthly value of merchandise imports. Calculated at fixed exchange rates. 9. The denominator is foreign short-term liabilities of credit institutions and investment banks and includes derivatives as of July 2007. 10. Prices in SDR. Annual figures are % changes between annual averages. Since January 2007, the 12-month percentage change in marine product prices denominated in the króna. 11. Real effective exchange rate of the Icelandic króna based on relative consumer prices (a trade-weighted average of 17 trading partner countries' consumer prices is used). 2000 = 100. Average over periods. 12. Annual figures show change in annual averages. 13. Cash basis. Without privatisation revenues. Adjusted for changed timing of expenditure charges in Jan.-Nov. 2004. 14. OMX15 index. Annual figures are % changes over year. 15. Residential housing in the greater Reykjavík area. Annual figures are % changes over year.

1. Annual averages (May 1988–100) and changes between years. 2. Annual averages. Exchange rate of the króna against a trade-weighted average of foreign currencies, 1983=100. 3. 2000=100. ULC=unit labour cost. 4. Annual average yield of indexed Treasury bonds of all maturities. Yields on Iceland Stock Exchange (OMX Iceland) from 1987. Before that, primary market yields. 5. Gross foreign exchange reserves at end of period as a ratio of the average monthly value of merchandise imports in the last 12 months. Calculated at fixed exchange rates. 6. External debt ratio is calculated as a percentage of accumulated GDP for the last four quarters at current exchange rate.

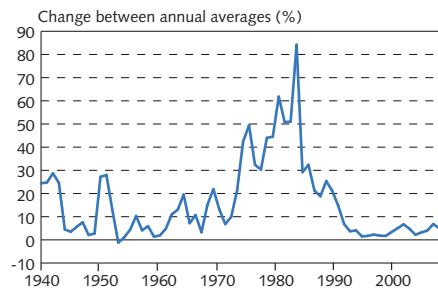

Table 2 (continued) Historical economic indicators

	Components of GDP (% change from previous year)				External trade (% change from previous year)				General government (% of GDP) <sup>7</sup>				Labour market (% of labour force)		Wages (% change from previous year) Real disp. Real income per wages <sup>9</sup> capita	
	Private consump- tion	Gross fixed cap- formation	National expendi- ture	Goods & services (volume changes)	Terms of trade		Curr. acc. balance (% of GDP)	Financial balance	General government (% of GDP) <sup>7</sup>		Expend- itures	Unem- ployment	Labour particip. <sup>8</sup>			
					Exports	Imports			Revenues	Expenditure						
1978	9.0	-5.5	2.1	15.2	3.7	0.2	1.2	0.0	35.1	34.2	0.4	73.0	.	8.5
